

Plants for Sale 5-2013

I don't have a lot of anything. Please understand if plants become unavailable. I never produce zillions of any cross and my breeding stock can only grow so fast. I made the mistake years ago of dividing things down too small and it took a long time for them to grow back.

Also, I have a book for sale; *Bulbophyllums; the Incomplete Guide, From A to Why?* for \$45, but discounted to \$35 which includes shipping within continental US **for orders of 5 plants or more**; sent under separate shipping package.

Thanks for your interest, Bill Thoms (dukesthoms@verizon.net) (1-813-684-4101)
